

Little Redheads

Across America

by **Andrea Wilson Woods**

One part geography and one part history, Nicole Giladi's impressive self-published book, *Little Redheads*

Across America, shows the many faces of redheaded children across the United States.

Amidst colorful graphics, funky fonts, and fun facts, Giladi uses pictures of real children along with their autobiographical information to illustrate just how special being a redhead can be.

Some extra sections include "What Shade of Red are You?" "Sunburns and Skin Care" and my personal favorite "Teasing and Name Calling."

This book is a must-buy for any parent with a redheaded child.
